#### COMPANY DESCRIPTION

P/E

International Personal Finance (LSE: IPF) provides affordable consumer credit services in Europe, Mexico, and Australia. The Company's customers are underserved being unable to access credit from banks and traditional lenders. IPF offers a range of products including home credit, digital revolving and instalment loans, credit cards, and mobile wallets. The Company currently serves approx. 1.7 million customers in 9 international markets.

#### **INTERNATIONAL PERSONAL FINANCE PLC (LSE: IPF)**

### **COMPANY UPDATES**

**FY23 Continues Positive Trend:** IPF reported strong net receivables up 4% year over year to £875M. Additionally customer lending declined 1% from prior year, however, was up 11% when excluding the transitional impact from operations in Poland. Annualized revenue yield was also strong, moving to 54.8% in 3Q23, up 4.0 points from 3Q22. Impairments remain in-line with expectations at 12.0%, in large part due to robust credit standards and despite the cost-of-living crisis. Lastly, the costs to income ratio is ahead of management plans, down to 56.7% in 3Q23. The Company remains on strong footing with £100M in liquidity available to meet funding requirements through 2024. Notably, IPF is still seeing strong customer repayment performance in large part due to the responsible underwriting and despite any impact from the cost-of-living crisis.

**Continued Expansion in Mexico:** IPF continued its expansion into the Mexico Home Market by following the opening of the Tijuana branch in 2022 with the opening of the Tampico branch in March of 2023. The learning curve to get these locations seems to be short as the Company reported an increase of 5% customer lending y/y, customer numbers growing by 1.7% in the quarter to 710,000 and closing receivables growing by 7.5% to £185.0M. This is all served by the very critical first cohort of employees.

**Credit Card is Building Traction:** The roll out of credit cards in Poland is on track with 100,000 cards issued. The current estimate is that credit card penetration is between 66% to 83% of year end targets, with the pace of uptake expected to maintain steady as the IPF continues to transition current customers. It is expected that the full transition of the Polish market will be completed by the end of 2024.

**Digital Strength Remains:** Digital saw positive momentum in all markets as demand remains strong leading to an 12% increase in customer lending when excluding the impacts from the transition in Poland. Of note was the increase in gross receivables to £216M, which is up 7.0% year over year. When excluding operations in Poland and the collect-out markets of Spain and Finland, receivables grew 20%.

**Revised Guidance:** Given the strong performance in all three segments leading to results that are ahead of expectations, coupled with the rise in global interest rates, management was comfortable revising their guidance in 1H23. This is headlined by a new revenue yield target range of 56% to 58%, up from 53% to 56%. This is in concert with the 15% increase in dividend payments per share to 3.1p, up from 2.7p in 1H22. This guidance has not been changed as of 3Q23.

**Valuation:** We use a DCF Analysis and a Comparison Analysis to frame valuation. For the comparison analysis we used a combination of P/E, P/TBV, and EV/EBT multiples to determine a valuation range for IPF. When we blend these multiple comparisons, in combination with our DCF analysis, we arrive at a median price range of £1.73 to £2.26 with a midpoint of £1.99.

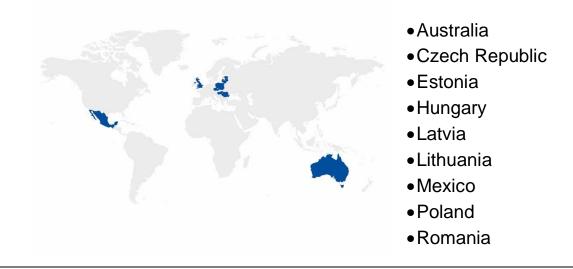

### **Company History**

International Personal Finance PLC was founded in 1997 and is headquartered in Leeds, United Kingdom. The Company was originally a division of Provident Financial before it was divested in 2007. In 2015, it acquired MCB Finance, a digital credit provider, broadening its product range into digital credit products and extending its geographic presence to reach new customers. The Company began trading on London Stock Exchange in 2007 under the symbol "IPF."

### **Business Overview**

International Personal Finance PLC (LSE: IPF) provides affordable consumer credit services in Europe, Mexico, and Australia. The Company's customers are underserved, being unable to access credit from banks and traditional lenders. IPF offers a range of products including home credit, digital revolving and instalment loans, credit cards, and mobile wallets. The Company currently serves approx. 1.7 million customers in 9 international markets.

# Exhibit 1: Markets Served

Source: Company Website

## **Business Divisions**

IPF is a financial services company providing credit services to people who are typically excluded from mainstream finance. The Company's customers are individuals who usually have a low-to-moderate income and limited credit histories, which subjects them to refusals from traditional banks and credit providers. Management has prioritized offering clients simple and affordable products that meet their specific needs, making this a significant part of IPF's identity. The Company stresses its responsibility to provide supportive and flexible customer service in all its markets. IPF operates in three distinct divisions: European Home Credit, Mexico Home Credit, and IPF Digital.

#### **Exhibit 2: Business Divisions**

Source: Company Presentation

### **European Home Credit**

The European Home Credit division is IPF's legacy division that has been in business for twenty-five years. It operates in four central European countries and offers home credit, instalment loans, credit cards, and value-added services to its customers. This segment is increasingly being digitized to further capitalize on the established history of strong cash generation. As the segment diversifies its traditional home credit to include a broader suite of products, the segment is expected to continue generating target returns of ~20%.

In 2022, the division faced a regulatory headwind due to tighter rate caps in Poland and the economic ramifications of the war in Ukraine. In December 2022, the Polish government introduced a lower, non-interest rate cap which reduced maximum non-interest fees that can be charged on a loan. This cap reduced the maximum non-interest fees to 45% of the loan value, from 100%. Additionally, the region experienced high inflation rates in eastern Europe primarily due to the war in Ukraine. Despite this, the division was able to grow customer lending by 10.5% as a result of digitizing and diversifying its offered services and products, while maintaining a responsible approach to lending.

### **Mexico Home Credit**

Similar to the European division, the Mexico Home Credit division offers home credit, hybrid loans, and other value-added services. The Mexican Home Credit division has high demand and strong growth potential, allowing the Company to deliver strong return on required equity (RORE). Despite an increasingly high inflationary macroeconomic environment, the Company experienced healthy growth in the country, increasing customer lending by 22.5% year over year as of 1H23. This was largely aided by the increasing penetration into IPF's existing footprint.

This division is a significant opportunity for revenue growth. Mexico has a population over 125 million people and IPF estimates that roughly two-thirds of the population are not properly banked. The Company states that it has a target market of about twenty-eight million people with an additional 15 million people in its expansion plan. By penetrating this vast and largely untouched market, IPF has the potential to strengthen its footprint in the country and substantially grow its revenues. The Company has made progress on this by expanding in Tijuana in the northwest in 2022 and Tampico in the east in 2023, targeting a market of approximately 1.7 million customers.

### **IPF Digital**

IPF Digital offers customers digital access to revolving credit lines, mobile wallets, and digital installment loans as well as other services. The division allows IPF to reach customers that are digitally save and younger who are looking for an affordable end-to-end digital service with around-the-clock digital access to their accounts. During 1H23, the division experienced receivable growth of over 10% in multiple regions such as Mexico (46%), Australia (29%), and the Baltics (13%). Despite exiting the Finish and Spanish markets in the wake of regulatory changes, IPF Digital's solid products and services as well as its scalability provides the Company with a path to further grow its business internationally and potentially outside of its current markets.

### **Growth Strategy**

Management has been clear in its expectations and priorities in expanding its business. IPF is targeting to deliver returns of 15% to 20% by 2025. This will be accomplished by expanding its product building its distribution, range, and investing in technology as a roadmap to continued growth. In 2022, IPF progressed in this by expanding its geographic presence in Mexico and digital channels in markets. European Bolstering the Company's growth strategy is a strong and well capitalized balance sheet as well as continued customer confidence.

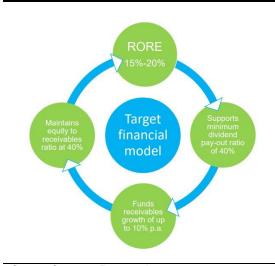

**Exhibit 4: Financial Model** 

Source: Company Presentation

### **Financial Model**

IPF has a strict financial model that is focused on delivering sustainable earnings and returns. The Company makes its investment decisions with the goal of achieving 20%+ Return on Required Equity (RORE). The model acts as a cycle that maintains balance. A delivery of RORE of 15% to 20% supports a minimum dividend payout ratio of 40% returned to shareholders, which allows receivables growth of up to 10% per fiscal year. This helps maintain an equity to receivables ratio of about 40%. IPF's financial model is supported by focusing on revenue yield, impairment rate, and costincome ratio being delivered by each division. Continued strong results in core key performance indicators (KPIs) aid in keeping the financial model sustainable, however current macroeconomic headwinds may bring increased pressure in the shortterm. To date, the Company has not seen an impact from the current cost of living crisis.

4

### **Market Overview**

IPF operates in a highly competitive market. What separates the Company from its competitors, such as banks and other lenders, is its focus on assisting a customer base that is usually neglected by delivering strong relationships that often include face to face contact, helping customers stay in control of their repayments. This allows IPF to make effective credit assessments while also enhancing financial inclusions leading to significant reach into underserved portions of markets in Mexico, Australia, and Central Europe. These markets offer IPF the greatest opportunity to expand its reach and grow its customer base.

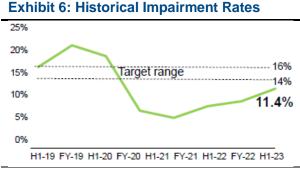

### Exhibit 5: European Inflation Rates June 2023

#### Source: eurostat

However, IPF may experience global economics headwinds going forward which could adversely affect its business. A high inflationary environment coupled with rapidly rising rates will make it difficult for people, especially those represented in IPF's markets, to be able to obtain or pay off loans given their decreasing disposable income. Due to IPF's close relationship with their customers, small loan sizes that tend to not overburden customers, and government support that customers get, we believe it is reasonable to assume that IPF's customer base is better suited to weather market downturns compared to the market. As shown in Exhibit 5, a few of IPF's target markets such as Poland, Lithuania, and Romania are experiencing inflation higher than the EU Area as of June 2023. Should this trend continue in the remainder of 2023 and into 2024, IPF will likely see greater risk of falling demand.

Should the Company see increased volatility due to market forces over the next 12 to 18 months, IPF

Source: Company Presentation

will be expected to maintain its lending standards to manage its impairment rate. IPF has shown resiliency during several market cycles, the most recent example seen in 2020. At the height of the Covid pandemic, the Company only saw the impairment rate rise ~260bps above target levels. Given the strong balance sheet, track record of resiliency during challenging macro events, and impressive navigation through changing political environments, we expect management to have all the tools necessary to weather future downturns.

### **Risks**

As with any investment, there are certain risks associated with IFP's operations as well as with the surrounding economic and regulatory environments common to the consumer finance industry and operating in foreign countries.

**Credit** – IPF's customers are those with low and/or poor to no credit history. This puts the Company at a significant risk of loss should its customers fail to meet their contracted repayment obligations. High inflationary markets put strain on people's disposable income and affect their ability to meet their obligations.

**Regulatory Changes** – IPF's industry is subject to significant regulatory change. Governments legislation can lead to a tightening of rates, which can negatively impact the Company's ability to operates in certain countries.

**Political Risk** – IPF target markets include countries susceptible to significant political risk. The Company's eastern European operations are in close proximity to Ukraine, which is still in the midst of its war with Russia. The war has negatively impacted Ukraine's neighbors, increasing inflation at a higher rate than the rest of the world and increasing consumer uncertainty. While this uncertainty has abated in recent months, the nature of the Company's target markets keeps political risk relevant.

**Competitive Industry** – IPF operates in an industry that is highly competitive, facing competition that includes large and reputable banks and lenders. Despite operating in a niche market, the Company could lose market share to larger competitors if they decide to pivot and begin offering their own products and services to IPF's customers. Should this happen, IPF could see a loss of customers, leading to a negative impact on earnings.

### VALUATION SUMMARY

We use a DCF Analysis and a Comparison Analysis to frame valuation.

### **DCF Analysis**

We are modeling near term revenue growth rates driven by continued growth in the Mexican market, offset by challenges related to the credit card roll out in Poland. Our longerterm revenue growth normalizes around 5%.

				Т	ermir	nal (	Growt	h Ra	ates		
		1	.0%	1	.5%	2	.0%	2	2.5%	3	.0%
ate	11.00%	£	2.48	£	2.59	£	2.72	£	2.86	£	3.02
it c	12.25%	£	1.99	£	2.07	£	2.16	£	2.26	£	2.37
Inc	12.50%	£	1.91	£	1.98	£	2.07	£	2.16	£	2.26
Discount rate	12.75%	£	1.83	£	1.90	£	1.98	£	2.06	£	2.16
Di	13.00%	£	1.75	£	1.82	£	1.89	£	1.97	£	2.06

For our sensitivity analysis, we used a range of discount rates from 12.25% to 12.75% and terminal growth rates between 1.50% and 2.50%. We selected this discount rate to account for the challenging macro backdrop, IPF's smaller market cap, and the rising interest rate environment. These assumptions result in a valuation range of £1.90 to £2.26, with the mid-point at £2.07.

Sensitivity Analysis:

All Values in USD at an exchange rate of \$0.82 GBP/USD Source: Company reports, CapitalIQ, Stonegate Capital Partners

We used a combination of P/E, P/TBV, and EV/EBT multiples to determine a valuation range for IPF.

When we look at P/E Multiples we note that comps are trading at an average of 12.8x 2024 estimates. This compares to IPF trading at 6.7x. We believe a multiple range of 8.0x to 9.0x is appropriate given the growth potential that IPF has in both the Mexican Home Market as well as their digital offerings. This will bring IPF more inline with sector peers.

We believe that a P/TBV value of below 1.0x makes IPF attractive from a valuation standpoint. When we apply a conservative range of 1.00x to 1.25x the valuation spans £1.83 to £2.29.

Comparable companies are trading at an estimated FY24 EV/EBT multiple of 23.6x at the median vs IPF at 10.1x. When we apply a multiple range of 11.5x to 13.5x, which is conservative relative to peers, we arrive at a valuation of £1.58 to £2.25.

When we blend these multiple comparisons, in combination with our DCF analysis, we arrive at an average price range of £1.73 to £2.26 with a midpoint of £1.99.

### Important disclosures and disclaimers

The following disclosures are related to Stonegate Capital Partners (SCP) research reports.

The information used for the creation of this report has been obtained from sources we considered to be reliable, but we can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice and SCP does not undertake to advise you of any such changes. In preparing this research report, SCP analysts obtain information from a variety of sources, including but not limited to, the issuing Company, a variety of outside sources, public filings, the principals of SCP, and outside consultants. SCP and its analyst may engage outside contractors in the preparation of this report. The information contained in this report by the SCP analyst is believed to be factual, but we can neither guarantee nor represent the completeness or accuracy of the information herewith. While SCP endeavors to update the information contained herein on a reasonable basis, there may be regulatory, compliance, or other reasons that prevent us from doing so. The opinions or information expressed are believed to be accurate as of the date of this report; no subsequent publication or distribution of this report shall mean or imply that any such opinions or information remains current at any time after the date of this report. Reproduction or redistribution of this report without the expressed written consent of SCP is prohibited. Additional information on any securities mentioned is available on request. SCP does not rate the securities covered in its research. SCP does not have, nor has previously had, a rating for any securities of the Company.

Recipients of this report who are not market professionals or institutional investors should seek the advice of their independent financial advisor before making any investment decision based on this report or for any necessary explanation of its contents. Because the objectives of individual clients may vary, this report is not to be construed as an offer or the solicitation of an offer to sell or buy the securities herein mentioned. This report is the independent work of SCP and is not to be construed as having been issued by, or in any way endorsed or guaranteed by, any issuing companies of the securities mentioned herein.

SCP does not provide, nor has it received compensation for investment banking services on the securities covered in this report. SCP does not expect to receive compensation for investment banking services on the securities covered in this report. SCP has a non-exclusive Advisory Services agreement to provide research coverage, retail and institutional awareness, and overall Investor Relations support and for which it is compensated \$5,000 per month. SCP's equity affiliate, Stonegate Capital Markets (SCM) - member FINRA/SIPC - may seek to provide investment banking services on the securities covered in this report for which it could be compensated.

SCP Analysts are restricted from holding or trading securities in the issuers which they cover. Research Analyst and/or a member of the Analyst's household do not own shares of this security. Research Analyst, employees of SCP, and/or a member of the Analyst's household do not serve as an officer, director, or advisory board member of the Company. SCP and SCM do not make a market in any security, nor do they act as dealers in securities.

SCP Analysts are paid in part based on the overall profitability of SCP and SCM. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by SCP for services described above. No part of Analyst compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article. This security is eligible for sale in one or more states. This security may be subject to the Securities and Exchange Commission's Penny Stock Rules, which may set forth sales practice requirements for certain low-priced securities.
