SSC Security Services Corp. provides physical and cyber security services to corporate and public sector clients in Canada. It provides physical security services, such as on-site security guards, remote continuous camera monitoring, mobile patrol, and investigative services. The company also provides cyber security services, including managed security, vulnerability and risk analysis, cyber security consulting, chief information security officer (CISO) consulting, and cyber security staff augmentation services. Further, it designs, builds, installs, and monitors electronic security systems. The company was formerly known as Input Capital Corp. and changed its name to SSC Security Services Corp.

## SSC SECURITY SERVICES CORP. (TSXV: SECU)

## COMPANY UPDATES

Continued execution of pivot strategy: The Company has continued to execute on their strategy to grow their security business through acquisitions and organic growth. After a busy 2021, SECU followed up by acquiring Logixx in 2022. The Logixx deal was an all-cash deal that transacted for approximately $3 x$ prior years EBITDA. This presents a phenomenal value considering most private companies in this sector trade for about $4 x$ to $6 x$ EBITDA.

Share buyback plan: In December of 2022 the Company announced a share buyback plan. The specifics of this plan include the intent to purchase $1,200,000$ shares representing $10 \%$ of float. The share buyback program was initiated on January 4, 2023 and will continue until January 3, 2024 or until all $1,200,000$ shares are bought. This is in addition to the $41 \%$ of shares outstanding that the Company has bought back through NCIB and Substantial Issuer Bids over the last 5 years.
Debt free with no plans to change: SECU is in a strong position from a liquidity standpoint. They currently have no debt and management has made it clear that they will be judicious if and when they take on more debt. Additionally, the company is in a strong position from a working capital standpoint with $\$ 24.5 \mathrm{M}$ in working capital to end the year. The company also has approx. $\$ 35.7 \mathrm{M}$ in adjusted working capital which accounts for portions of their legacy business that will most likely become cash within the next year.

Legacy business is now immaterial: Management has noted on their most recent release that their legacy business is no longer material to their financials. As the Company continues to wind down their remaining legacy assets, we expect that those cash flows allocated to legacy assets will be reallocated to the security services portion of their business. In the meantime, we have accounted for the legacy assets on their balance sheet by including these assets into adjusted working capital. We also subtract these near cash legacy assets from Enterprise Value to arrive at Adjusted EV. We also expect SECU to start trading at a multiple that is more in-line with other security services businesses.
Consistent dividend payer: We note that the Company has paid a dividend of $\$ 0.12$ annually since inception. This results in a current dividend yield of approximately $4.4 \%$. This consistency proves management's focus on delivering shareholder returns and has signaled that they intend to maintain this dividend for the foreseeable future.

Valuation: The Company is currently trading at 2024 expected EV/EBITDA of $4.1 x$ vs average comps of $7.9 x$. We note that historically comps trade between 8.1 x to 9.6 x on average. Considering this historical range, we apply a range of $8.0 x$ to $9.0 x$ with a midpoint of $8.5 x$ to our 2024 EBITDA and arrive at a valuation of $\$ 4.14$ to $\$ 4.44$ with a midpoint of $\$ 4.29$.

When we look at valuation through a discounted cash flow lens, we apply a discount range of $10.00 \%$ to $11.00 \%$ with a midpoint of $10.5 \%$ leading to a valuation range of $\$ 4.63$ to $\$ 5.15$ with a midpoint of $\$ 4.88$.

## Business Overview

SSC Securities Services Corp. ("SSC", "SECU" or "the Company") is a national security company based out of Saskatchewan, Canada that is focused on growth in the physical and cyber security space. The Company currently operates as the largest publicly traded security company in Canada with approximately 2,750 employees. SSC has primarily grown by acquisition and intends to continue having M\&A be a driving force of their growth. Previously SSC was Input Capital Corp. and operated outside of the security and alarm services industry.

SSC Securities Services Corp. was incorporated in October of 2011 and trades on the TSX.V under the symbol "SECU". SSC also began trading on the OTCQX Best Market under the symbol "SECUF" in November of 2021.

## Company History

The Company was originally known as Input Capital, but prior to the inception of Input Capital the founders worked together on a fund known as Assiniboia Farmland where they operated in the agriculture industry. Founded by Doug Emsley (current CEO of SSC) and Brad Farquhar (current CFO of SSC), Assiniboia ran for 8 years and was a farm leasing business. They would buy land and then rent that land to farmers in Canada. After 8 years of $19.9 \%$ annual returns (net of fees) this farm leasing business was purchased by the Canada Pension Plan. This experience at Assiniboia gave the founders critical experience prior to the founding of Input Capital.

Two years prior to the sale of Assiniboia Farmland, the founders created Input Capital. Input Capital operated on a royalty streaming platform for farmers of canola. Input Capital would lend timely cash to canola farmers and in return would retain options to purchase a portion of the crops. This business was highly profitable until 2019 when China banned the import of canola from Canada. Input Capital also ran into a series of defaults from farmers during this time, all of which was recovered after court proceedings. As Input Capital began to wind down their canola positions, they began their transition to the security space, where Doug Emsley had decades of experience.

In 2021, Input Capital acquired SRG Security Resource Group ("SRG"), a local security services provider. They also acquired specific regional operations from Impact Security Group Inc. shortly after the SRG acquisition. Following these acquisitions, the Company changed its name to SSC Security Services Corp. At the beginning of 2022, SSC entered into an agreement to purchase Logixx Security Inc. which was a Toronto based provider. This transaction finalized in June of 2022 in cash for a valuation of approximately $3 x$ EBITDA at a time when private transactions typically take place for $4 x$ to $6 x$ EBITDA.

Exhibit 1: Subsidiary Ownership

The combination of SRG and Logixx gives SSC a strong cyber and physical security base to continue to grow both organically and through acquisition. Going forward, management has made clear that the legacy portions of SSC, namely the canola interests, are no long material to the Company's operations.

## Business Segments

## Overview

SSC Security Services Corp. operates in two primary segments. About $85 \%$ of their revenues come from physical security services with the remaining $15 \%$ of their services coming from cyber security services. The Company boasts over 750 clients across multiple geographies with no client representing more than $10 \%$ of total revenue. Many of these clients are well-known international brands such as Uber, Apple, Coca Cola, and DHL.

## Physical Security Services

SSC will contract their physical security services to a variety of different client types which can include:

- Strip malls
- Refineries
- Office buildings
- Airport clients

Onsite physical guards can be both uniformed and plainclothes. The airport offerings can include just about everything outside of passenger screening with the Company doing all the cargo screening for Air Canada.

Other offerings found under the physical security umbrella include:

- On-site security guards
- Remote video monitoring
- Mobile patrols

When implementing these offerings, the Company typically operates out of a central hub which helps reduce the labor costs as it is more efficient for one employee to monitor cameras as opposed to teams that monitor properties on foot.

This model is critical to the economics of SSC's business. Inherent to the security industry is low margins. Key performance indicators for security services contracts are typically based on the amount of unbillable overtime expensed. Most contracts include a margin of about 3\% expected overtime that cannot be billed to the client. If costs are kept below 3\% the contract becomes more profitable for the Company, above 3\% the contract becomes less profitable for the Company, and typically when unbillable overtime costs exceed $6 \%$ the contract becomes unprofitable for the Company.

Telling is the way that SSC was able to transform the operations at Logixx before and after the acquisition. Prior to being acquired by SSC, Logixx unbillable overtime expenses routinely ran around $8 \%$ per contract. After the acquisition, SSC was able to bring unbillable overtime expenses down to approximately $2.4 \%$. Management expects to continue to standardize practices and improve efficiencies as they acquire new companies.

## Cyber and Electronic Security Services

Cyber security services make up a smaller portion of SSC's business offerings. These services typically entail monitoring of computer networks. Penetration into this market often starts with a short term white hat hacking contract where the Company will attempt to breach the clients software. This hack event is followed by a report that outlines the weaknesses and strengths of the client's networks and is typically followed by engaging in a $24 / 7$ network monitoring contract.

This revenue is recurring in nature and has larger margins than the physical security segment. SSC Security Services Corp. was able to get into this market in large part due to their acquisition of SRG. Going forward management expects to penetrate this market further through strategic acquisitions and effective hiring.

Exhibit 3: SECU Blue Chip Client Overview

[^0]
## Market Overview

## Overview

SSC Security Services Corp. operates in a highly competitive and highly acquisitive market. Overall, there is an estimated $\$ 1.6 \mathrm{~B}$ in total addressable market for security services providers, with the majority of that market up for grabs due to fragmentation of providers. Going forward, the market is expected to see $9.7 \%$ CAGR through 2026.

Exhibit 4: Canadian Business Segments Maturity Comparison

Source: Security Services of Canada Industry Report

Cyclically there is very little fluctuation between seasons. Providers will see slight fluctuations during the winter holiday season as clients require increased security, but overall month to month operations are stable. From a macro point of view the security industry tends to be resistant to recessions as most contracts with client are typically 3-5 years long. Notably, SSC has many client relationships that have lasted 15-20 years. If anything, security service become more necessary in a downturn.

## External Growth

As noted, the security services industry is a very liquid market with many M\&A deals per year. The larger companies in the industry tend to become acquisitive in fits and spurts but tend to not target the same companies that SSC targets due to their size. Most of the companies that SSC targets are smaller operations that have the characteristics of being started by former police officers or former security guards who do not have an exit plan and would benefit from stronger operational support. Due to companies subcontracting between each other, there are a lot of interrelationships between competitors that provides the groundwork for the M\&A market to have insight into acquisition targets.

Exhibit 5: Security Services Transactions

[^1]
## Growth Strategy

Overview
Management has been explicit in their expectations going forward with the goal to generate \$200M to $\$ 300 \mathrm{M}$ in revenue per year within the next 3-5 years. This will be accomplished through a combination of external and internal growth. The expectation is that top line growth will run about $10 \%$ in the physical security segment and about $20 \%$ in the cyber security segment. Externally, the Company expects to continue to be selective when purchasing companies that can be accretive to EBITDA. Aiding this growth will be the Company's strong balance sheet and lack of debt.

Exhibit 6: Company Growth Strategy

## Risks

As with any investment, there are certain risks associated with SSC's operations as well as with the surrounding economic and regulatory environments common to the Security and Alarm Services industry and operating in a foreign country.

- SSC operates in a very labor-intensive industry that is transitioning to being less labor intensive. While the Company is keeping pace with this transition, they are subject to macro forces that have the potential to increase and decrease the size of the labor pool in the short term. Additionally, certain portions of this labor force have unionized, which could pose another risk of labor disruptions outside of management control.
- The Security and Alarm Services industry is highly competitive. Driving this competition is the low barriers to entry. Unforeseen competition could arise quickly due to these low barriers to entry that would require management to adapt and respond very quickly.
- Security services are subject to slim margins that are largely dependent on managing the unbillable overtime expenses per contract. Ideally management can keep unbillable overtime labor at under $3 \%$. Management has shown their ability to reduce these expenses when they acquired Logixx, however unbillable overtime work is subject to factors that can be outside of management's control causing contracts to be less lucrative than expected.
- The Company is exposed to business transition risk. While management has significant experience in the security services, SSC as a company is relatively new to the sector. Management has shown an ability to navigate the transition between the legacy business and the security services business, however, they are still a relatively new player in the sector.

## VALUATION SUMMARY

We use a comparable analysis and a discounted cash flow analysis to help frame our valuation of SSC.
For the DCF analysis we assume a stable revenue growth rate of $9.0 \%$ which is slightly more conservative than managements estimate of top line growth rates. For the terminal growth rate, we use a range of $1.75 \%$ to $2.25 \%$ with a midpoint of $2.0 \%$.

We note that the comparable companies tend to trade at an average EV/EBITDA range between 8.1 x to 9.6 x . Currently SSC is trading at 4.2 x of 2024 Adjusted EV/EBITDA, we believe a multiple range of 8.0 x to 9.0 x with a midpoint of 8.5 x is more appropriate given the historical trading range of the comps.

## Important disclosures and disclaimers

The following disclosures are related to Stonegate Capital Partners (SCP) research reports.
The information used for the creation of this report has been obtained from sources we considered to be reliable, but we can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice and SCP does not undertake to advise you of any such changes. In preparing this research report, SCP analysts obtain information from a variety of sources, including but not limited to, the issuing Company, a variety of outside sources, public filings, the principals of SCP, and outside consultants. SCP and its analyst may engage outside contractors in the preparation of this report. The information contained in this report by the SCP analyst is believed to be factual, but we can neither guarantee nor represent the completeness or accuracy of the information herewith. While SCP endeavors to update the information contained herein on a reasonable basis, there may be regulatory, compliance, or other reasons that prevent us from doing so. The opinions or information expressed are believed to be accurate as of the date of this report; no subsequent publication or distribution of this report shall mean or imply that any such opinions or information remains current at any time after the date of this report. Reproduction or redistribution of this report without the expressed written consent of SCP is prohibited. Additional information on any securities mentioned is available on request. SCP does not rate the securities covered in its research. SCP does not have, nor has previously had, a rating for any securities of the Company. SCP does not have a price target for any securities of the Company.

Recipients of this report who are not market professionals or institutional investors should seek the advice of their independent financial advisor before making any investment decision based on this report or for any necessary explanation of its contents. Because the objectives of individual clients may vary, this report is not to be construed as an offer or the solicitation of an offer to sell or buy the securities herein mentioned. This report is the independent work of SCP and is not to be construed as having been issued by, or in any way endorsed or guaranteed by, any issuing companies of the securities mentioned herein.

SCP does not provide, nor has it received compensation for investment banking services on the securities covered in this report. SCP does not expect to receive compensation for investment banking services on the securities covered in this report. SCP has a non-exclusive Advisory Services agreement to provide research coverage, retail and institutional awareness, and overall Investor Relations support and for which it is compensated $\$ 4,000$ per month. SCP's equity affiliate, Stonegate Capital Markets (SCM) - member FINRA/SIPC - may seek to provide investment banking services on the securities covered in this report for which it could be compensated.

SCP Analysts are restricted from holding or trading securities in the issuers which they cover. Research Analyst and/or a member of the Analyst's household do not own shares of this security. Research Analyst, employees of SCP, and/or a member of the Analyst's household do not serve as an officer, director, or advisory board member of the Company. SCP and SCM do not make a market in any security, nor do they act as dealers in securities.

SCP Analysts are paid in part based on the overall profitability of SCP and SCM. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by SCP for services described above. No part of Analyst compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article. This security is eligible for sale in one or more states. This security may be subject to the Securities and Exchange Commission's Penny Stock Rules, which may set forth sales practice requirements for certain low-priced securities.
