Business Overview

Sky Harbour Group Corporation is a pioneering aviation infrastructure company dedicated to developing the first nationwide network of private hangar campuses in the United States. The Company's mission is to address the persistent shortage of high-quality hangar space for business aviation, a sector experiencing significant demand growth. By offering an exclusive network of Home-Basing campuses for business aircraft, Sky Harbour aims to provide private aircraft owners and operators with a secure, efficient, and premium home for their aircraft.

Exhibit 1: Sky Harbour Business Overview

Source: Corporate Presentation

Sky Harbour's business model is built on a real estate development and aviation service framework. The Company secures long-term leases on strategically located airport land and develops high-end, private hangar campuses tailored to meet the needs of business aviation clients. As a green field development SKYH shareholders participate in all of the upside as new leases are signed. Additionally, due to the greenfield status, the Company funds development with tax exempt debt further adding to the attractiveness of the projects. These campuses are not just physical hangar spaces; they are comprehensive service hubs that offer concierge-level services designed to optimize aircraft management, improve security, and enhance convenience for aircraft owners.

The Company's approach is a significant departure from the traditional community hangar model, which often presents operational inefficiencies, security risks, and logistical challenges for high-net-worth individuals and corporations operating private jets. Instead, Sky Harbour delivers a differentiated offering that caters to the growing segment of the business aviation market that values exclusivity, privacy, and high-end services. This unique positioning allows Sky Harbour to attract a clientele that seeks more than just storage space for their aircraft; they seek a seamless, premium experience.

Sky Harbour's growth strategy is centered on expanding its footprint to major business aviation hubs across the United States. By leveraging a proven site selection and acquisition methodology, the Company aims to establish itself as the leading provider of private hangar infrastructure in North America. This strategy involves identifying airports with significant demand-supply imbalances for high-quality private hangar space and securing long-term leases at these locations. Efficiencies are driven by the Company having a vertically-integrated metal building manufacturer and one national leasing team.

In addition to its real estate and service offerings, Sky Harbour integrates advanced technology and design into its hangar campuses. Each facility is constructed using a standardized design approach, which allows the Company to streamline development timelines and reduce costs while maintaining high standards of quality. This operational efficiency is a key component of Sky Harbour's business model, enabling the Company to scale its operations effectively and deliver consistent value to its clients.

Overall, Sky Harbour Group Corporation is uniquely positioned within the business aviation infrastructure sector. By addressing a critical shortage of high-quality hangar space, leveraging a scalable development

model, and capitalizing on industry growth trends, the company is poised for significant expansion in the coming years. Sky Harbour's innovative approach and commitment to excellence make it a leader in the niche but highly lucrative business aviation infrastructure market.

Segment Overview

Sky Harbour Group Corporation's business model revolves around the development, leasing, and management of private aviation hangars, segmented into several core areas. The primary business activity, private hangar development, involves acquiring long-term ground leases at key airports and constructing purpose-built private hangar campuses. These facilities are designed with high-end finishes, state-of-the-art security, and optimal operational efficiency to cater to business jet owners.

Private Hangar Development & Leasing and Property Management

Each campus is constructed using a standardized design approach, allowing the Company to streamline development timelines and reduce costs while maintaining quality. As of 2Q25, Sky Harbour operates nine campuses across key markets, including Sugar Land Regional (SGR), Nashville International (BNA), Miami Opa-Locka Executive (OPF), San Jose Mineta International (SJC), Camarillo (CMA), Phoenix Deer Valley (DVT), Dallas Addison (ADS), and the recently added Seattle Boeing Field (BFI). The Denver Centennial (APA) campus remains under active construction, with openings expected in the coming weeks. The Company also signed new ground leases at Hillsboro (HIO) and Stewart International (SWF), bringing its total number of secured airport locations to ten operational or in development.

Source: Corporate 10q

Once developed, Sky Harbour leases these dedicated hangar spaces to business aircraft owners under multi-year agreements averaging approximately 3.5 years. The dedicated, private hangar model significantly reduces the risk of aircraft damage common in shared hangar settings and enhances aircraft security and operational readiness. The Company has seen robust leasing activity following the recent openings of campuses in Phoenix and Dallas and anticipates additional lease-ups for its Denver campus in the coming months.

Concierge Aviation Services

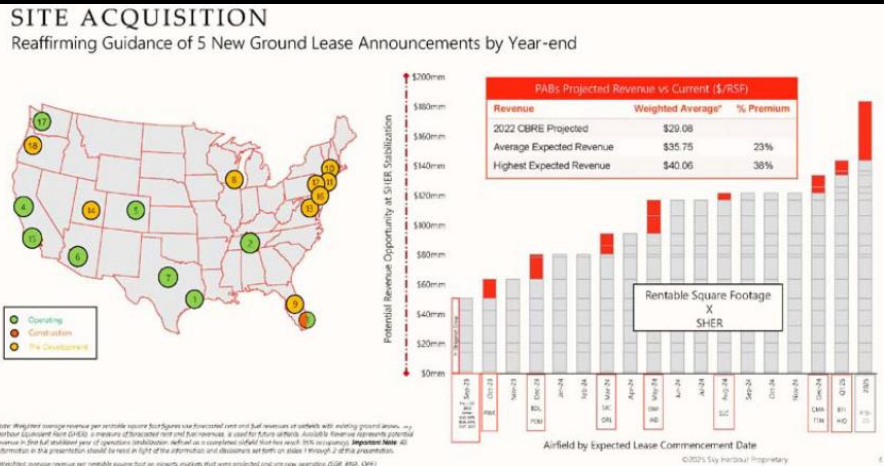

Beyond real estate, Sky Harbour integrates aviation service elements into its offering. Each campus provides tenants with services such as aircraft fueling and ground support, ensuring a seamless ownership experience. This holistic approach differentiates Sky Harbour from traditional hangar providers that cater to transient, not based, aircraft and adds additional fuel revenue beyond lease payments. The concierge aviation services segment has contributed to increased customer satisfaction and retention, further solidifying Sky Harbour's market position.

Expansion Through Strategic Site Selection

Sky Harbour employs a proprietary site selection methodology, targeting airports with significant demand-supply imbalances for high-quality private hangar space. The Company prioritizes locations where business aviation activity is growing, and suitable infrastructure is limited. This strategic site selection has enabled Sky Harbour to expand its footprint effectively, with new projects soon to be completed in Denver, Phoenix, and Dallas.

By leveraging its expertise in aviation real estate and development, Sky Harbour is positioning itself as a leader in the niche but highly lucrative business aviation infrastructure sector. The Company's ability to secure prime locations, coupled with its comprehensive service offerings, ensures a competitive edge in meeting the growing demand for private hangar space.

Exhibit 3: Acquisition & Scaling Overview

Source: Corporate Presentation

Growth Drivers

Sky Harbour is well-positioned to capitalize on multiple growth drivers that support its expansion strategy and long-term financial performance.

1. Increasing Demand for Business Aviation

The business aviation sector has witnessed steady growth over the past decade, driven by rising corporate profits, globalization, and an increasing preference for private air travel. The COVID-19 pandemic further accelerated this trend as individuals and corporations sought safer, more flexible travel alternatives to commercial airlines. The continued expansion of the U.S. business jet fleet directly translates into increased demand for high-quality hangar space, a core focus area for Sky Harbour.

2. Chronic Hangar Supply Shortage

One of the most significant challenges in the business aviation industry is the limited availability of high-quality hangar infrastructure. Data from industry sources indicate that hangar occupancy at major business aviation airports often exceeds 100%. It's important to note that hangar occupancy percentage is a different metric from the hangar supply/demand imbalance at an airfield. However, this metric still highlights the significant demand for hangar space, validating it as a key growth driver. Sky Harbour's strategy to develop exclusive private hangar campuses addresses this unmet need, making its offering particularly attractive to aircraft owners seeking security, convenience, and premium services.

3. Strategic Location Expansion

Sky Harbour’s growth is fueled by a robust pipeline of new development projects. The Company has secured long-term leases at multiple key airports across the U.S. and is actively expanding its portfolio. The Company’s disciplined approach to site selection ensures that each new campus is located in a market with strong demand and favorable economic conditions.

4. Scalable Business Model and Operational Efficiency

By standardizing its hangar designs and leveraging a vertically integrated development model, Sky Harbour can achieve economies of scale as it expands. This efficiency translates into lower costs per project and higher profitability over time. Additionally, the company’s ability to finance developments through federally-tax exempt municipal bond offerings enhances its capital efficiency and reduces its cost of funding.

Exhibit 4: Industry Shortage

BUSINESS AVIATION SUFFERS FROM CHRONIC HANGAR DEFICIT

Consistent Demand Growth over pre-COVID Decade

- 29,600,000 square feet net growth in US business aviation (BizAv) fleet
- 16,600,000 square feet net growth in >24’ tail height segment
 - Most existing US hangar inventory features main-door-threshold height < or = 24 feet

Cumulative square footage of US business aviation fleet growing faster than number of aircraft in fleet

Cumulative US Business Aircraft Fleet Square Footage

Source: JETNET data as of January 2022

Source: Corporate Presentation

5. Additional Revenue Streams

While Sky Harbour’s primary source of revenue is leasing hangar space, the Company is also positioned to generate revenue from ancillary services such as fuel sales, maintenance services, and aircraft management. These additional revenue streams help diversify income sources and strengthen the overall financial resilience of the business.

Market Overview

Sky Harbour operates in a highly specialized segment of the aviation infrastructure market. The business aviation sector in the U.S. is substantial, comprising thousands of private jets and corporate aircraft that require dedicated storage and operational facilities. This market is driven by several key factors that position Sky Harbour favorably.

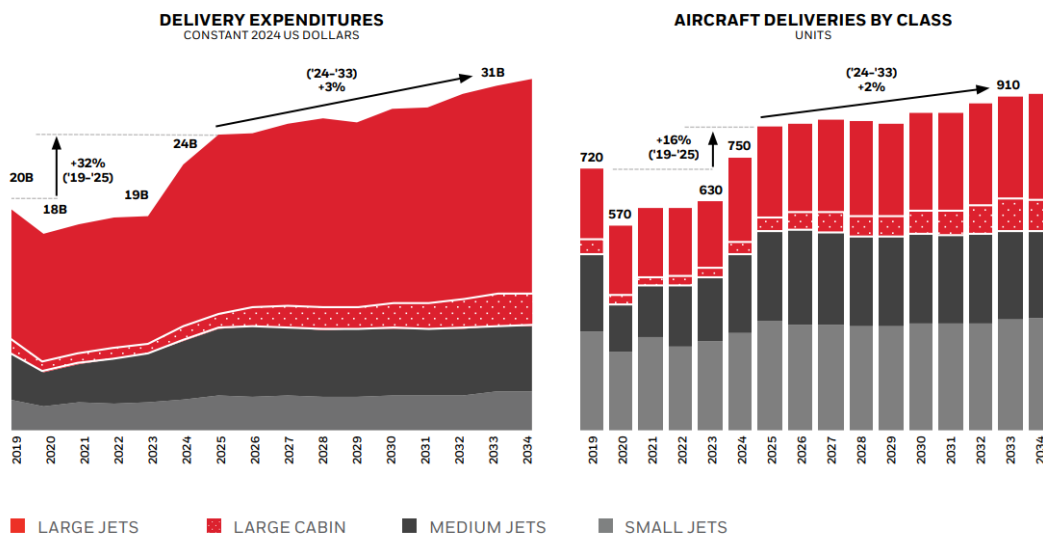

The demand for business aviation services continues to grow, driven by increased private jet ownership and corporate aircraft usage. According to industry reports, the global business aviation market is projected to see significant growth, with Honeywell's Global Business Aviation Outlook forecasting 8,500 new business jet

deliveries valued at \$280 billion over the next decade. In 2025 alone, deliveries are expected to rise by 12% compared to 2024.

This growth is fueled by rising corporate profits, globalization, and an increasing preference for private air travel, particularly in the wake of the COVID-19 pandemic. The total square footage of the U.S. business aviation fleet has been expanding at a faster rate than the number of aircraft, indicating a growing need for larger and more sophisticated hangar facilities. This trend aligns perfectly with Sky Harbour's premium private hangar model, which caters to the increasing demand for high-quality, exclusive hangar space.

The aviation infrastructure sector presents significant barriers to entry, including regulatory challenges, long-term lease negotiations, and high capital investment requirements. Sky Harbour's established relationships with airport authorities and its ability to navigate these complexities provide a competitive advantage, making it difficult for new entrants to replicate its model at scale.

Exhibit 5: Business Aviation Market Outlook

Source: Honeywell Aerospace (2024 Global Business Aviation Outlook)

The Company's proprietary site selection methodology and strategic long-term leases at key airports further strengthen its market position.

The competitive landscape of the aviation infrastructure market is characterized by a few key players, with most existing providers operating under a traditional community hangar model. This model does not offer the same level of exclusivity and personalized service as Sky Harbour. By focusing on private, high-end aviation infrastructure, Sky Harbour differentiates itself from fixed-base operators (FBOs) that primarily offer fuel services and shared hangar spaces.

This unique positioning limits direct competition and enhances Sky Harbour's appeal to high-net-worth individuals and corporations seeking premium services.

Exhibit 6 : Global Aviation Infrastructure Market

Global Aviation Infrastructure Market, 2024-2032 (USD Billion)

Source: Zion Market Research

Despite macroeconomic fluctuations, the business aviation sector has historically demonstrated resilience due to the high net worth of its clientele and the essential nature of corporate travel. The aviation infrastructure market, valued at approximately ~900 billion, is projected to grow at a compound annual growth rate (CAGR) of over 4.2% between 2024 and 2032.

Aviation real estate is considered a strong asset class with long-term value appreciation, further strengthening Sky Harbour's market positioning.

The integration of emerging technologies, such as artificial intelligence and IoT, is set to revolutionize the operational landscape, paving the way for smarter, more efficient airport experiences.

In summary, we believe Sky Harbour Group Corporation is uniquely positioned within the business aviation infrastructure sector. By addressing a critical shortage of high-quality hangar space, leveraging a scalable development model, and capitalizing on industry growth trends, the Company is poised for significant expansion in the coming years.

Risks

Interest Rates – High interest rates have historically impacted the value of real estate. SKYH's business model is sensitive to volatile movements in interest rates as a result of its leverage, SKYH could see a reduction in the value of its assets as well as a rise in the cost of debt should rates remain volatile.

Tenants – Weakening economic conditions could cause SKYH's tenants to be unable to meet obligations. Any failure to meet these obligations would result in a significant impact on SKYH's operations.

Regulatory - The Company relies on a regulatory system that prioritizes and allows for the bidding on long term leases. Should the regulatory system change it would inhibit SKYH from securing additional leases, thus capping the Company's growth potential.

Geography – The locations of SKYH's geographic markets pose environmental and economic risks. Immobile hard assets are subject to environmental disasters which could damage the properties.

Profitability - The Company has no history of net income, dividends, or cash flow and there can be no assurance that the Company will be profitable going forward. In the case that the Company cannot create enough revenue to sustain on-going business activities, Sky Harbour's only source of financing will be through the sale of existing securities or borrowing.

IMPORTANT DISCLOSURES AND DISCLAIMER

- (a) The research analyst and/or a member of the analyst's household do not have a financial interest in the debt or equity securities of the subject company.
- (b) The research analyst responsible for the preparation of this report has not received compensation that is based upon Stonegate's investment banking revenues.
- (c) Stonegate or any affiliate have not managed or co-managed a public offering of securities for the subject company in the last twelve months, received investment banking compensation from the subject company in the last 12 months, nor expects or receive or intends or seek compensation for investment banking services from the subject company in the next three months.
- (d) Stonegate's equity affiliate, Stonegate Capital Partners, "SCP" has a contractual agreement with the subject company to provide research services, investor relations support, and investor outreach. SCP receives a monthly retainer for these non-investment banking services.
- (e) Stonegate or its affiliates do not beneficially own 1% or more of any class of common equity securities of the subject company.
- (f) Stonegate does not make a market in the subject company.
- (g) The research analyst has not received any compensation from the subject company in the previous 12 months.
- (h) Stonegate, the research analyst, or associated person of Stonegate with the ability to influence the content of the research report knows or has reason to know of any material conflicts of interest at the time of publication or distribution of the research report.
- (i) No employee of Stonegate has a position as an officer or director of the subject company.

Ratings - Stonegate does not provide ratings for the covered companies.

Distribution of Ratings - Stonegate does not provide ratings for covered companies.

Price Chart - Stonegate does not have, nor has previously had, a rating for its covered companies.

Price Targets - Stonegate does not provide price targets for its covered companies. However, Stonegate does provide valuation analysis.

Regulation Analyst Certification:

I, Dave Storms, CFA, hereby certify that all views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed in this report.
